

# Onboarding Troubleshooting Guide

## Purpose

This document serves as a comprehensive guide to help identify, troubleshoot, and resolve typical issues that new employees might face during the setup of their laptops and the initial onboarding process. It is intended for IT support staff or as a self-service resource for employees. The guide facilitates quick problem resolution while upholding security and compliance standards.

## Troubleshooting Table Guide

Issue Area	Problem	Symptoms	Troubleshooting Steps	Recommended Resolution
Login & Password Issues	Cannot log in with company credentials or temporary password	<ul style="list-style-type: none"><li>• Password rejected</li><li>• Account locked out</li><li>• Incorrect login prompts</li></ul>	<ol style="list-style-type: none"><li>1. Confirm correct email and temporary password.</li><li>2. Check keyboard layout (US vs UK).</li><li>3. Try most recent password if changed previously.</li><li>4. Reset password via self-service or IT.</li><li>5. Document reset in IT ticket.</li></ol>	Password reset followed by successful login verification.
